

Dear Colleague,

Please be aware the Student Information Service (SIS) release notes covering the implementation of Phase 1 of Early Data Share are now available to view on the HE Portal.

This functionality will provide you with earlier visibility within SIS of your students who have approved funding, but who have not yet returned their online declaration to SLC. This application work stage is known as 'approved awaiting signature'.

We are pleased to inform you that from Monday 27th January, students with an application status of approved awaiting signature will be populated into SIS for 2013/14 and 2014/15 academic year applications. We do however expect that the population of this data into SIS will take up to 5 days to complete.

This important change will allow you to further encourage student to finalise their applications by returning their declaration forms, and to change or correct any application errors at an earlier stage, including course and fee information.

Thanks & regards

Susan Lindley  
HEI Services Development Manager
